

SEP sesam SAP R/3

Certified Data Backup for Business Intelligence

SEP Software

SEP delivers high performing, standardized data backup, and comprehensive availability solutions for professional IT environments in both small and large operations. SEP sesam simplifies complex enterprise quality data security (Data Backup, Data Restore, Disaster Recovery, Encryption, Firewall control, etc.).

SAP Certified Integration

SEP sesam is one of the highest regarded solutions, and has obtained the most certifications for a 3rd party software available for SAP environments.* SAP has certified SEP sesam's functional database backup, database restore and database recovery for online connectors from Oracle and MaxDB. Furthermore, the uninterrupted operation of backup technology for the database and metadata for running backups were tested and certified. SEP sesam proficiently handles SAP implemented API's for backup, restore and recovery and has been certified as SAP Solution Manager Ready.

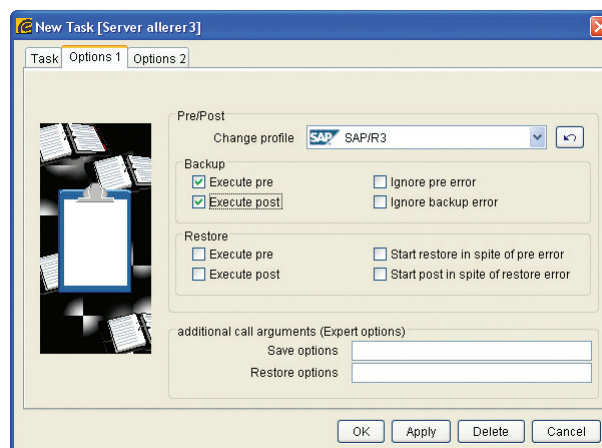

SEP sesam is certified for integration with SAP Netweaver 7.10:

- BC-BRI LIUX 7.10 for Oracle 10g database on 64 Bit technology using SUSE Linux
- BC-SDB LIUX 7.10 for MaxDB 7.6 database on 64 Bit technology using SUSE Linux
- BC-BRI W2K3 7.10 for Oracle 10g database on 64 Bit technology using Windows 2003 Server
- BC-BRI AIX64 7.10 for Oracle 10g database on IBM Power 5 (64Bit) using AIX

SEP sesam supports other SAP R/3 Applications: Oracle DB on SUN, Oracle DB on Reliant Unix, Oracle DB on Tru64, MaxDB on AIX, MaxDB on Windows 2003 & Windows 2008

SEP sesam Database Online Module for SAP R/3 on MaxDB/SAP DB and Oracle

The SEP sesam Database Online Module for SAP R/3 running on MaxDB/SAP DB and Oracle assures interruption free backup operation of the respective database directly to the Backup Media/Device, without an intermediate backup to the file system. The Online Module integrates with the database interface allowing all Backup, Restore und Recovery available to execute without hindrance. Control and planning for database backup is possible using SEP sesam, by using the SAP R/3 environment tools or it can be set through database priorities in the Data Backup Server.

Database und Groupware Online Modules

SEP sesam offers the largest selection of database and groupware online modules in the industry. These application options run on Linux, Microsoft Windows, AIX and SUN Solaris and provide the highest level of assurance for data backup and restore security in heterogeneous networks. Further information for database and groupware backup and recovery can be found at <http://www.sep.de>.

*SEP sesam has the most SAP certifications in the industry (Certified for SAP NetWeaver). It is certified in the categories Backup and Database Backup. (Source: SAP Website, <http://www.sap.com/ecosystem/customers/directories/SearchSolution.epx>, 04.03.2008)
